Re: Partial Certification Memo for Case Number 2026OPA-0072

Partial Certification Memo

OIG has reviewed the investigation for case number 2026OPA-0072.

On 6/30/2026, this case was routed by OPA to OIG with a request for certification. After review, OIG determined additional information was needed before certification could be issued. Specifically, OPA did not explore an insubordination allegation that was made in the complaint. OIG routed the case back to OPA with a request for additional investigation. On 7/31/2026 OPA returned the case to OIG for re-evaluation and certification. However, OIG still finds the investigation to be lacking in its exploration of the insubordination allegation. OPA interviewed the NE about his recollections relating to the allegation, as well as a subordinate WE who provided a brief synopsis of his recollections. However, OPA did not interview the NE's director supervisor who could have provided additional insight into the specific incident alleged by the Complainant.

Accordingly, OIG can certify this case as Timely and Objective but cannot certify on the element of Thoroughness.

Respectfully,
