### Application

- 1. Request.** Explain in detail exactly what is being requested, i.e., the length of the extension requested, the work to be done during the extension, measures to avoid environmental harm and safety problems, the justification for the extension request and any extenuating circumstances why the October 31st code deadline could not be met.
- 2. Site plan.** Attach a detailed site plan showing where the proposed grading activities and/or site stabilization activities during the extension will occur. The site plan must also show all additional measures, including erosion control systems and measures to control stormwater

runoff from the site, that are proposed so that the grading and/or site stabilization activities will not result in adverse impacts.

3. **A schedule of the proposed grading and/or site stabilization work.** The schedule must include specific dates when excavations and backfilling will occur as well as the dates when the locations for stormwater collection will be completed and ready for use. The proposed monitoring and special inspection dates must also be included, as well as all other significant proposed dates.
4. **Statement from Project Geotechnical Engineer.** Attach a confirmation **from the geotechnical engineer** stating that the engineer has reviewed and approved the proposed site plan and schedule and that, in the geotechnical engineer's opinion, no adverse environmental impacts, environmental harm or safety problems will occur to the ECA, on site, or to neighboring properties from allowing grading activities or site stabilization activities to occur on site in accordance with the submitted plan and schedule. The geotechnical engineer shall include any recommendations the engineer believes are necessary so that the proposed work can be safely accomplished given the increased seasonal potential for severe weather.

**5. Agreements to Comply with Conditions in Extension Letter.**
